

1. Expense Tracker Technical Architecture

High-level mapping of architecture choices, project structure, and the relationship between server-side utilities and client-side

2. Implementation Lifecycle Workflow

The process flow from research to final merge, including the mandatory testing gate.

❑ Could not render diagram — invalid Mermaid syntax

Raw Mermaid code:

```
graph TD
    START[Start Implementation] --> PHASE-0["PHASE-0: Research & Decision Recording"]
    PHASE-0 --> DEV[Development of Components & Logic]
    DEV --> TEST_CHECK{"Tests Implemented?"}

    TEST_CHECK -- "No" --> TASK-UNIT-TESTS["TASK-UNIT-TESTS: Implement Unit Tests"]
    TASK-UNIT-TESTS --> TEST_CHECK

    TEST_CHECK -- "Yes" --> MERGE_GATE{"Meets Repo Guidelines?"}
    MERGE_GATE -- "No" --> DEV
    MERGE_GATE -- "Yes" --> END[Merge to Main]
```
